Facts & Figures

TRENDS TO WORK WITH

A multi-coloured pen
that will brighten
anyone's day!

It's a fact.

It is said that a pen can write up to
2,7 kilometres.

And do you know the first thing
that almost everyone writes with a
new pen? Their own name!

TREND SPOTTING!

'Green' promotional gifts are on the up and up. Of all companies that purchased promotional gifts in 2014, 28% (also) chose to buy 'green' ones. For nearly half of those companies, more than 25% of the promotional gifts purchased were 'green'. More than a third of the companies that did not purchase 'green' promotional gifts did consider doing so.

Pens on a desk look very nice

TIP

8473 PAGE 79

it's a fact.

Pens on a desk: it always looks nice & stylish, especially the better quality ones, and those with a distinctive design!

TREND SPOTTING !

With more and more people communicating via email, sms, Instagram and Whatsapp, you may well think that people would use fewer pens and be less and less interested in (attractive) pens. This is by no means the case! This is supported by a study conducted on behalf of the Wall Street Journal, which revealed that pens still sell very well in the retail sector. And products that sell well in the retail sector almost always make excellent promotional gifts. Pens, including promo pens, are passed from hand to hand and the logos are consequently seen by dozens of people. Which helps raise brand awareness! That proves just how useful & effective as a promotional gift a pen is!

it's a fact.

Functional products are on trend. These are quality products that people really can and will use. The recipients consequently keep such products for longer: good for your brand, and they have less environmental impact as they won't be thrown away for years.

TREND SPOTTING!

Durable promotional gifts

When choosing a promotional gift 40% of buyers consider the durability. In 2014 this was less than 20%. More than half the companies expect the durability of promotional gifts to become increasingly important in years to come.

Facts & Figures

TRENDS TO WORK WITH

it's a fact.

In our lifetime, we commute an average of

67.000

kilometres to and from work!

Bags with an attractive print, unusual colour or a striking text can become collectors' items.

TIP

TREND SPOTTING!

Due to new EU legislation, shops no longer provide free plastic bags. Excellent alternatives are cotton shopping bags. Bags with which the user can make a statement. Bags that offer retailers an extra marketing tool.

TREND SPOTTING!

Go for EU certificates!

Research reveals that one in five companies have encountered problems over the past few years regarding the safety of promotional products or the materials used to make them. Problems that do not arise with products that are European certified. An EU certificate shows that the product complies with European legislation and regulations. That is worth considering when choosing a promotional gift. Only 19% of all clients actually ask for such a certificate: something more clients should do!

PRINTING TECHNIQUES

A short description of available printing techniques to print your promotional products can be seen below.

TAMPON PRINTING

A negative film is made and placed on a cliché. The cliché plate is exposed to light with the film. The exposed part of the plate is hardened. The unexposed part gets a small impression. The plate is put into the machine and filled with ink, the scraper slides over the plate which leads to a small layer of ink remaining in the impression. This is taken up by the silicone stamp and placed on the object, such as a pen.

SILKSCREEN PRINTING

The ink is pushed on the object through a gauze which has open and closed parts. The print is pressed on the product by a scraper which is moved across the gauze. Screen printing is used to print flat products. For products with a certain roundness such as buckets, the round silkscreen printing technique is used. With this technique almost every product can be printed.

LASER ENGRAVING

This technique provides a permanent impression which can't be modified. Metal products are the most appropriate for this technique. The upper layer of the material is removed with a laser. Colours can't be applied with this technique and are determined by the material and/or other coloured under layers of the products.

DIGITAL PRINTING

The benefits of this technique are that films aren't made anymore and no machines are set up. The pc from the supplier with the design is connected to a digital printer which can print on flat products. This way of printing results in very sharp images. Transparent stickers are also printed this way.

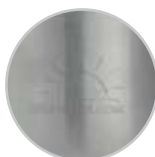

TRANSFER PRINTING

In this technique your imprint is applied on a (transfer) paper. The product is pressed together with the transfer paper at high temperature. The transfer paper attaches itself to the product through the pressure and heat. This technique is very suitable for flexible materials like umbrellas.

DOMING

A layer of epoxy resin is applied on adhesive labels which have already been printed and cut. The layer is very clear and shows the printing below even more clearly. Also an extra dimension arises through the resin layer and ensures the protection of the printing.

EMBOSSING

No ink is used in this technique, an imprint is made on or in a printing plate. By pressing this product on a soft material or leather product an imprint is made on it. This technique is very suitable for upscale products.

MUGS

Mugs are printed by using a special paper which has been edited by the silkscreen technique. The paper is pasted on to the product and placed into an oven. The heating process transfers the ink to the mug.

PAPER/STICKER

Paper can be printed offset. A printing press transmits the artwork to paper by using "u" (uncoated) colours.

SUBLIMATION

An inkjet printer is filled with sublimation inks and with a specially coated paper the print is put on the product through a heat press. The ink changes into a gas and after cooling down becomes solid again with a superior printing quality.
